## **Koch Membrane Systems to Showcase Filtration Solutions at Anuga FoodTec**

**Wilmington, MA – March 6, 2018** - Koch Membrane Systems, Inc. (KMS), a global technology leader in developing and manufacturing membrane filtration technologies, announced today it will demonstrate filtration solutions for the dairy, food and beverage industry at Anuga FoodTec, 20-23 March, in Cologne, Germany, booth E-29 in Hall 10.2.

KMS will showcase Dairy-Pro®, a complete line of new, advanced sanitary spiral products, specifically designed to meet the performance and quality requirements of the dairy industry. The Dairy-Pro line features new developments, including BAND-TITE® technology and an expanded UF membrane portfolio.

Additionally, KMS will display filtration systems specifically designed for the food and beverages industries. KMS provides membranes for protein processing, sweetener processing, vinegar clarification and nutraceutical processing. Furthermore, KMS's beverage portfolio offers solutions for wine, beer and juice clarification; Lees filtration; color reduction and concentration; and many more industry challenges.

KMS also will present solutions to support customers' water reuse, process water treatment and wastewater plans — helping minimize wastewater costs.

“We are excited to offer standard and customized membrane modules and complete systems, as well as comprehensive process solutions for the food and beverage industry,” said Martin Awe, general manager of process separations for Koch Membrane Systems EMEA. “To enhance customer processes, we provide a one-stop service, including global installation, customer service and support to keep our customer's systems running at maximum efficiency.”

To learn more and discuss filtration solutions with KMS experts, visit booth E-29 in Hall 10.2.
